

# Compliance checklist

To review compliance regulations and standards, read the [controls, frameworks, and compliance](#) document.

## ☐ **The Federal Energy Regulatory Commission - North American Electric Reliability Corporation (FERC-NERC)**

The FERC-NERC regulation applies to organizations that work with electricity or that are involved with the U.S. and North American power grid. Organizations have an obligation to prepare for, mitigate, and report any potential security incident that can negatively affect the power grid. Organizations are legally required to adhere to the Critical Infrastructure Protection Reliability Standards (CIP) defined by the FERC.

### **Explanation:**

## ☒ **General Data Protection Regulation (GDPR)**

GDPR is a European Union (E.U.) general data regulation that protects the processing of E.U. citizens' data and their right to privacy in and out of E.U. territory. Additionally, if a breach occurs and a E.U. citizen's data is compromised, they must be informed within 72 hours of the incident.

**Explanation:** Compliance with this clause is necessary. For organizations involved in accepting online payments and conducting business in the European Union.

## ☒ **Payment Card Industry Data Security Standard (PCI DSS)**

PCI DSS is an international security standard meant to ensure that organizations storing, accepting, processing, and transmitting credit card information do so in a secure environment.

**Explanation:** PCI DSS compliance is required for all organizations that store, process or transmit payment card data, including any business that could compromise the security of their credit card processing environment.

Demonstrate that the processing of your payment card data is secure and compliant with international standards. Help prevent credit card data breaches.

☐ **The Health Insurance Portability and Accountability Act (HIPAA)**

HIPAA is a federal law established in 1996 to protect U.S. patients' health information. This law prohibits patient information from being shared without their consent. Organizations have a legal obligation to inform patients of a breach.

**Explanation:**

☒ **System and Organizations Controls (SOC type 1, SOC type 2)**

The SOC1 and SOC2 are a series of reports that focus on an organization's user access policies at different organizational levels. They are used to assess an organization's financial compliance and levels of risk. They also cover confidentiality, privacy, integrity, availability, security, and overall data safety. Control failures in these areas can lead to fraud.

**Explanation:** An overview of internal security, In addition, details of the security framework, which will be consistent with the actual working system that occurs within the organization including coordinating with partners and various business relationships as well. Nowadays, SOC reports are very important to the sales team of an organization, often referring to internal security and stability for their customers.

This will support security. This can help to better secure the company's infrastructure. And help them identify and mitigate potential risks, threats, or vulnerabilities to critical assets.
